

# VOLVO INTRODUCES A SPORTS CAR THAT REALLY HAULS.

The new Volvo 1800ES is sort of a flying trunk.

It's powered by the same two-litre, computer-controlled, fuel-injected engine as our 1800E sports coupe.

(Car and Driver magazine clocked it from a standstill to 60 in 9.2 seconds.)

But as you see, the 1800ES not only hauls, it carries.

By stretching the roof backward and the trunk floor forward, we've provided a carpeted cargo area 5' x 4' x 22" with the rear seat down. So you can take long vacation gear along when you take a long vacation.

And when you arrive, you won't be in agony. When Car and Driver timed the 1800ES they also sat in it. And declared the leather-upholstered bucket seats "...the most hospitable in the business."

But even more comforting, the 1800ES is a Volvo. And like all Volvos, it's built to last. Which means the 1800ES is a sports car designed to travel slowly on the road to ruin.

A fact you'll appreciate over the long haul.
